

COAST QUICK FIT BIKE RACKS

Coast's new Quick Fit Bike Racks have been design to make it easier than ever to transport your bikes with you on your adventures. With their patented quick connector, they are extremely easy and quick to fit on the tow bar!

Their ingenuity shines in their unique folding system which allows the bike racks to collapse down, making them easy to carry and store. With their convenient tilt mechanics that allow you to access your boot even while they're fitted, the Quick Fit Bike Racks make traveling with bikes as easy as possible!

The Quick Fit XF series are designed to suit almost all tow bars and fit all bikes - including e-bikes - and wheel dimensions on wide, stable aluminium wheel holders. The Quick Fit Pro allows you to mount the bikes with the frame so there is no force on the pedals, and features wide, stable plastic wheel holders.

The range features optional Assist Ramps that allows users to maneuver bikes onto the the rack effortlessly. No need to fuss about setting them up - they come ready to go, right from the carton.
