# PERFECT FOR AUSSIE CONDITIONS

Thetford absorption fridges have been developed to meet the heavy demands of the Australian market.

Designed specifically for Recreational Vehicles, these European and American built units have the style, reliability and cooling performance that RVers love.

Thetford absorption fridges come with automatic energy source selection, which automatically picks up the best available energy source.

Next to that, all our fridges are equipped with external fans to boost the cooling performance even more.
