

IMPRESSIVE PERFORMANCE ON 12V

Thetford's compressor fridges offer very powerful, but efficient cooling on 12V. The unique venting system increases the cooling performance thanks to the separation of hot and cold air.

The ventilation is integrated which means that external vents are not required: no dust getting into your van. From the compact 80 Litre to the large 274 Litre option: Thetford offers you only the best.

The new T1274 is the latest addition to the Thetford compressor portfolio. This large 274 Litre compressor fridge stands out because of its residential styling and size. The top control panel includes venting for improved refrigerator performance and the split thermostat makes it possible to adjust the fresh food and frozen food compartment temperature individually.

All Thetford compressor fridges come with a Day and Night mode, making them a powerful, quiet and energy efficient option for every RV.
