350-06740

The range of eTOURER e-bikes offers efficient and effortless electrical assistance that allows you the freedom to power around town or access our beautiful and unique landscape with ease.

eTOURER electric bikes offer up a comfortable and relaxed ride and boast the following great features:

Shimano Gears, Derailleur & Cassettes: Renowned quality components that are robust, efficient, and aesthetically pleasing. Built for adventure, they offer quick and easy shifts, easy setup and intuitive control.

Batteries: High-quality Samsung and Beyonder Power cell technology batteries are guaranteed to enhance the mobility of eTOURER E-Bikes with their longevity and high-capacity performance.

Motors: Innovative and high-quality motors that make your effortless riding experience a breeze. Bafang and Aikema are leading suppliers of drive systems in the E-Bike industry.

SR Sun Tour Suspension: Utilising unique aluminium casting technology and over 30 years of research and experience, SunTour products are engineered to perform.

Tektro Brakes: All TEKTRON products are made with extreme quality control, delivering some of the highest quality braking systems available in the bicycle industry.
